CASE BASED QUESTIONS

- 40) Read the passage given below and answer the questions that follow.

Magadha became the most important *mahajanapada* in about two hundred years. Many rivers such as the Ganga and the Son flowed through Magadha. This was important for (a) transport, (b) water supplies (c) making the land fertile. Parts of Magadha were forested. Elephants, which lived in the forest, could be captured and trained for the army. Forests also provided wood for building houses, carts and chariots. Besides, there were iron ore mines in the region that could be tapped to make strong tools and weapons. Magadha had two very powerful rulers Bimbisara and Ajatasattu, who used all possible means to conquer other *janapadas*.

40. (i) Name the rivers of Magadha (1)

40. (iv) What did the Forests provide to the rulers of Magadha? (2)

41) Read the passage given below and answer the questions that follow.

Rotation is the movement of the Earth on its axis. The movement of the earth around the sun in a fixed path or orbit is called Revolution. The axis of the earth which is imaginary line, makes an angle of $66\frac{1}{2}^{\circ}$ with its orbital plane. The plane formed by the orbit is known as the orbital plane. The earth receives light from the sun. Due to the spherical shape of the earth, only half of it gets light from the sun at a time. The portion facing the sun experiences day while the other half away from the sun experiences night. The circle that divides the day from night on the globe is called the circle of illumination. The earth takes about 24 hours to complete one rotation around its axis. The period of rotation is known as the earth day.
